

## ASSIGNMENT 2

```
import random

temperature = random.uniform(0,100.00)
print("TEMPERATURE IS: {:.2f}".format(temperature))

humidity = random.uniform(0.00,100.00)
print("HUMIDITY IS: {:.2f}".format(humidity))

if(temperature>89.00):
    {
        print("HIGH TEMPERATURE DETECTED!")
    }
else:
    {
        print("TEMPERATURE IS IN LIMIT")
    }
```
